Project-004 : To-Do App (JS-04)

Description

Project aims to create a simple To-Do App.

Problem Statement

- Your company has recently started on a project that aims to create a simple To-Do App. So you and your colleagues have started to work on the project.
- User should create, delete and mark tasks as them done or undone

Project Skeleton

```
004-To-Do App (folder)
|
|----readme.md          # Given to the students (Definition of the project)
|----solution
        |----index.html
        |----style.css
        |----index.js
```

Expected Outcome

CSS3 To-Do List

Eat My Breakfast
Oatmeal, Fruits & Morning Tea

E-Mail Processing
Art&&Code, Personal

Meditation
Out Of My Mind

Code, Code, Code
Hit F12 & Let's Get Wasted

Watch Screencast
Ruby On Rails, Yeah!

TO-DO LIST

ADD TODO HERE...

+

YOUR TODOS:

ALL CAUGHT UP !

<ARSHAD KHAN/>

Objective

Make a To-Do App as in the sample designs.

At the end of the project, following topics are to be covered;

- HTML

- CSS

- JS

At the end of the project, students will be able to;

- improve coding skills within HTML & CSS & JS

- use git commands (push, pull, commit, add etc.) and Github as Version Control System.

Steps to Solution

- Step 1: Download or clone project repo on Github

- Step 2: Create project folder for local public repo on your pc

- Step 3: Create JS code for To-Do App

Part-1 HTML Structure

```
- Creat structure of the HTML5
- Give name of your project (title)
- Create the main structur of the HTML
```

Part-2 CSS Structure

```
- Set a background
- Set container background color and margin
- Define others color-size-padding etc...
```

Part-3 JS Structure

```
- Create code for To-Do App : User should create, delete  and mark tasks as them
 done or undone
```

- Step 4: Push your application into your own public repo on Github

- Step 5: Deploy your application on Github template to showcase your app within your team.

⌛ Happy Coding ✍
